Team ID	XXXXXX
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/your-team/AI-Powered-Debt-Relief-Financial-Recovery-Platform
Programming Language(s)	Python, JavaScript
Framework(s) Used)	FastAPI, React.js, Vite, AQLAlchemy
Key Features Implemented	User Authentication(JWT), Loan Management, AI Settlement Recommendation, Financial health and Calculation, EMI & Debt Analysis, Negotiation Letter Generator, Financial Dashboard
Pending / Incomplete Features	None
Setup / Run Instructions	Install dependencies, configure Gemini API key, run FastAPI backend and React frontend.

	Clone repository- git clone, Cd backend- pip install –r requirements.txt , Run backend -> uvicorn main:app –reload, Frontend-> cd frontend ->npm install, Run frontend -> npm run dev
Additional Notes	Uses SQLite, SQLAlchemy ORM, Google Gemini AI

Code Quality Checklist

S.No	Criteria	Status
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	partial
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes
