Maximum Marks	2 Marks

Data Flow:

Data Flow Description:

The Data Flow Diagram (DFD) illustrates how information flows through the FinRelief AI – AI Powered Debt Relief & Financial Recovery Platform. It shows the interaction between the borrower, system processes, databases, and the Google Gemini AI service. The system collects user and loan information, processes financial data, generates AI-powered settlement recommendations and negotiation strategies, stores the results securely in the database, and displays financial insights through the dashboard. This diagram represents the complete flow of data from user input

DFD Symbol Legend:

Symbol	Name	Usage in Project
Oval	External Entity	Represents the borrower or an external system such as the Google Gemini AI or API that sends or receives data from the platform.
Rectangle	Process	Represents a processing step such as User Authentication, Loan & Financial Data Processing, Settlement Prediction, AI Negotiation Strategy Generation, and Dashboard, Management.
Database/ Cylinder	Data Store	Stores application data such as User Database, Loan Database, Financial Profile Database, Settlement Records Database and AI History Database.
Arrow	Data Flow	Shows the movement of data between the borrower, system processes, databases, and the Goggle Gemini AI service (e.g, login details, loan information, settlement requests, AI responses, dashboard results).
