Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1.CUSTOMER SEGMENTS[CS] The AI Powered Debt Relief & Financial Recovery Platform is designed for borrowers who face challenges in managing loans and improving their financial health. The primary users include salaried employees, individuals with personal or multiple loans, borrowers struggling with EMI repayments, people seeking debt settlement guidance, and users looking for AI-powered financial assistance. The platform is also suitable for individuals who want personalized financial insights, intelligent settlement recommendations, and professional negotiation	6. CUSTOMER LIMITATIONS Many borrowers have limited financial knowledge, budget constraints, and insufficient awareness of debt settlement procedures. Some users also have limited technical skills and rely mainly on smartphones to access financial services. These limitations make it difficult for them to effectively manage loans and negotiate with lenders without proper guidance.	5. AVAILABLE SOLUTIONS Existing solutions include manual financial advisors, bank loan support services, online EMI calculators, and personal finance applications. While these solutions provide basic financial assistance, they often lack personalized AI-driven recommendations, automated settlement prediction, intelligent negotiation support, and professional settlement letter generation, making debt management more time-consuming and less effective.

support to recover from debt efficiently.		
2. PROBLEMS/PAINS Borrowers often face difficulties in managing multiple loans, tracking EMI payments, and understanding their overall financial health. Many struggle to determine suitable settlement options and lack professional guidance when negotiating with lenders. These problems occur frequently, especially during repayment periods or when financial stress increases due to overdue payments, making debt management a complex and stressful process. The absence of personalized financial insights further increases the difficulty of making informed financial decisions.	9. PROBLEM ROOT/ CAUSE[RC] The primary causes of borrower financial stress include poor financial planning, increasing debt obligations, limited financial literacy, lack of personalized settlement guidance, and the complexity of negotiating directly with lenders. These challenges often prevent borrowers from making informed financial decisions and managing their debts effectively.	7. BEHAVIOR Borrowers frequently search online for debt management solutions, postpone negotiations due to uncertainty, manually track loan repayments, and seek financial advice from banks or consultants. This behavior is generally high in intensity because financial obligations require continuous attention and timely decision-making.
3. TRIGGERS TO ACT Borrowers are motivated to seek financial assistance when they experience difficulty paying EMIs, receive loan repayment reminders, face increasing debt stress, or encounter financial emergencies.	10. YOUR SOLUTION The AI Powered Debt Relief & Financial Recovery Platform provides a comprehensive AI-driven solution that analyzes borrower financial profiles, calculates financial health metrics,	8. CHANNELS OF BEHAVIOR[CH] Online, borrowers use banking websites, financial applications, search engines, YouTube, and AI-based platforms to obtain financial guidance and debt management

The need to negotiate with lenders, reduce outstanding debt, and improve financial stability encourages users to use the FinRelief AI platform for intelligent financial guidance and settlement recommendations.	predicts optimal settlement recommendations, generates professional AI-powered negotiation strategies and settlement letters using Google Gemini AI, and offers an interactive dashboard for monitoring financial recovery. This enables borrowers to manage debt more effectively, negotiate confidently with lenders, and make informed financial decisions through a secure and user-friendly platform.	information. Offline, they visit bank branches, financial consultants, loan recovery offices, and discuss financial issues with family members or trusted advisors before making repayment decisions.
4.EMOTIONS Before using the platform, borrowers often feel stressed, anxious, confused, and uncertain about their financial situation and repayment options. After using the AI Powered Debt Relief & Financial Recovery Platform, they gain confidence through personalized financial insights, AI-generated negotiation strategies, and settlement recommendations, making them feel more informed, relieved, and optimistic about recovering from debt.
